

MARLON

RECREATIONAL PRODUCTS LTD.

SINGLE LOADER

DESCRIPTION

Marlon's single loader ramp makes getting your sled into the back of your pickup truck a breeze. Designed for single person use, its cantilever design makes one handed lifting of the sled easy and its casters, which are rated for 500 pounds each roll your sled smoothly into place in the bed of your truck.

Once the back of the ramp is lowered to the ground, simply drive your sled onto the ramp and once your ski tip touches the stopper, the cantilever can be easily activated by hand to lift the back of the ramp up and onto the the deck of your truck and then the Single Loader slides easily into place in the truck bed.

Not only is this perfect for easily loading your sled into the back of your truck, its casters make it perfect for use in your shop to maneuver your sled around and get it out of the way and safely into storage during the off season.

ABOUT US

The Marlon roots extend back 45 years as a distributor of recreational products for adventurers in British Columbia, Canada. As we matured in the marketplace, we identified a need to not only expand our offerings of recreational trailers and related accessories, but also innovate our own products to help address the specific needs of a growing customer-base in Canada and the USA.

#ThisIsTheMarlonWay.
